Provincial Weekly News Bulletin

New Settlers for Alberta
Under the immigration scheme of
the British and Canadian governments
14 families of new settlers are now
in Alberta having arrived the past
week from the old country. They
will be located in various places in
central and northern Alberta.

For the purpose of colonizing lands
which he owns in the Lethbridge
Northern Irrigation tract, H. E. Mol-
bach of Lethbridge is bringing in 20
families from Bessarabia. The new
colony, it is planned will raise from
360 to 500 acres of sugar beets each
year.

Municipal Hall Insurance
Approximately 57 per cent of the
hall insurance written in the province
during the past six years was carried
under the municipal plan, according to
a statement made at the annual meet-
ing of the municipal hall insurance board.

Provincial Savings Certificates
The first quarter of 1925 has
brought a total of \$1,945,239 into the
provincial treasury through the pur-
chase of savings certificates. This
is one of the largest total buyings for
a similar period since the savings cer-
tificate plan was instituted. To date
there are 4762 investors in these sav-
ings certificates, of which 4373 are
Alberta investors. From the United
States there are 92 investors in these
certificates while British Columbia
provided 106.

Prominent Visitor Coming
Alberta will have a prominent vis-
itor shortly in the person of the Duke
de Nemours, descendant of Louis
Philippe of France, and a nephew of
the King of Belgium, who is to visit
the farm of Lord Minto at Fort Sas-
katchewan near Edmonton.

Start Laying Steel
Laying of steel on the new Klipp-
Twin branch of the C.P.R. which tra-
verses the Lethbridge Northern Ir-
rigation tract, will commence the com-
ing week. The branch will be ready
for operation to handle the crop of
1925.

Pioneer Newspaper Man Retires
John A. Garwood, one of Alberta's
pioneer newspaper men, has retired
from the proprietorship of the Red
Deer News, which he has edited for
many years. His successor is H. C.
Scott, of Red Deer.

Spring Shows
Calgary spring show takes place this
week on April 8, 9, 10 and 11. Ed-
monton's spring show is the week fol-
lowing from April 14 to 18.

Weather Statistics for 1924
The greatest total precipitation in
the province during 1924 was at Cal-
gary which had 24 inches for the
year. Calgary also had the greatest
amount of sunshine during the year,
the total being 2771 hours, according
to figures secured from the Dominion
weather bureau at Calgary.

The precipitation in inches, and the
hours of sunshine at various points
was as follows:

Precipitation	Sun
Lethbridge	16 2192
Medicine Hat	9.56 2255
Vancouver	9.56
Macled	16.10
High River	23.65
Calgary	24.49 2271
Edmonton	15.21
Olds	20.77 2142
Lacombe	20.25 2056
Edmonton	18.76 2223
Red Deer	20.53
Stettler	15.35
Vermilion	17.16 2160
Albion	18.24
Grande Prairie	17.12 1999
Fort Vermilion	8.95 2061
Edson	20.58

The temperature records show con-
siderable range in temperature during
the month of December at every point
quoted. At Lethbridge the mercury
reached as high as 61 in December
and coldest dip was to 44 below zero.
The hottest day in July with 92 de-
grees. The coldest point was Red
Deer with a dip to 59 below zero in
December, but in the same month the
mercury also climbed to 41 U. above
zero. This is an exemplification of
the fact that Alberta's winter climate
is greatly moderated by the chinook
winds.

Success of Municipal Hospitals
The excellent administration of the
rural municipal hospitals of the pro-
vince, of which there are now 15 in
operation, is revealed by the annual
report of the supervisor, A. K. Whit-
ton. The average cost per patient
day for all purposes in the hospitals
was \$5.52, the lowest cost being at
Athabasca, at \$5.62 per patient day,
and the highest being at Onoway, at
\$6.52, but which includes the main-
tenance of a doctor. The average cost
per patient day in 1923 was \$5.82.
In the case of nine of the hospitals
there has been a reduction in the
cost per patient day as compared with
1923. There were 70,564 hospital days in
1924, and there were 7075 patients
treated in the rural municipal hospi-
tals. There were 1172 maternity

cases and 1122 babies born. A total
of 1441 minor operations and 824
major operations were performed at
the hospitals. In the five years that
the municipal hospital scheme has
been in operation there have been
23,377 patients cared for, including
4184 maternity cases, 4544 minor op-
erations and 2294 major operations.

DOUKHOBORS WILL NOT SEND KIDS TO SCHOOL

Nelson, B.C., April 5.—Twenty five
hundred Doukhobors in mass meeting
assembled at Brilliant this afternoon,
declared to Inspector W. R. Dunwood
of the provincial police and school in-
spector P. H. Sheffield, that they
would not send their children to the
schools.

Mosses Dunwood and Sheffield told
the meeting of the definite instruc-
tions from the attorney general and
minister of education, that the law
must be enforced.

The refusal was definite and cate-
goric. They would not obey the laws
of British Columbia, the Doukhobors
said, because these laws were con-
trary to the Doukhobor interpretation
of "the laws of God."

Educated people, they said, were
responsible for the death of Peter
Vergin, to which Inspector Dunwood
retorted that if they could prove who
had been responsible for the death of
Vergin he would see that within
two days of the production of such
proof they would be paid the reward
of \$3,000 which was offered.

Hint of a nude parade as a protest
against measures the government
might take in enforcing the school
law was given.

"You have the power to seize our
property for payment of fines but if
you do, all we can do is to take off our
outer garments," said one spokesman,
and murmurs which appeared to be of
approval, came from the Doukhobors
who were massed in front of the com-
munity meeting place, the women at
the right of the speakers and the men
to the left.

When Inspector Dunwood and In-
spector Sheffield pointed out to the
Doukhobors that in refusing to obey
the law they were opposing not only
the government of British Columbia,
but all the people, the Doukhobors
said that they regarded the power
of the law, but they wanted to be
left alone to live their own lives, and
that if their chattels were seized and
sold to pay fines, they could only
like Peter Vergin, "go down" which
they explained meant they would die
of hunger.

A minute or two later the question
was put to the whole mass, "Will you
obey the school law?" and from the
crowd came the chorus in Russian,
"No" the loudest response being
from the women, who frequently dur-
ing the meeting showed even more
clearly than the men their determina-
tion not to send their children to
school.

THE GRADING AND MARKING OF EGGS

The following regulations made un-
der the provisions of the Live Stock
and Live Stock Products Act, respect-
ing the grading and marking of eggs
were published in the Canadian Gazette.
Canadian eggs for export out of
Canada and all eggs for domestic
consumption in Canada, including
eggs intended for ship's stores, but
not including eggs intended for in-
cubation, shall be classified, candled
and graded as follows:

Class (1) Fresh—Eggs which have
not been held under refrigeration at a
temperature of 35 degrees Fahr-
enheit, or less, except when in transit,
or subjected to artificial preservation.
Grade (a) Specials—Eggs of uni-
form size, weighing 25 ounces to the
dozen or over, or 47 pounds net to the
30 dozen case; clean and free from
stain, strong and sound in shell; air
cell small, not over 1/4 of an inch in
depth; white of egg to be firm and
clear and yolk dimly visible. Maxi-
mum allowance at time of inspection
not to exceed 8 eggs per half case be-
low the grade stated.

Grade (b) Extras—Eggs reasonably
uniform in size, weighing at least 24
ounces to the dozen, or 45 pounds net
to the 30 dozen case; clean, sound in
shell; air cell not more than 1/4 inch
in depth, white of egg to be firm, yolk
may be visible provided there is no
distinct trace of outline and the yolk
blends gradually into the white. Maxi-
mum allowance at time of inspection
not to exceed 8 eggs per half case be-
low the grade stated.

Sub-Grade (1) Pullet Extras—Eggs
which have the quality of extras but
which fall short in weight shall be
known as pullet extras, provided they
weigh at least 20 ounces to the dozen,
or 42 1/2 pounds net to the 30 dozen case,
Maximum allowance at time of inspec-
tion not to exceed 8 eggs per half case
below the grade stated.

Grade (c) Firsts—Eggs weighing at
least 22 1/2 ounces to the dozen, or 42
pounds net to the 30 dozen case; clean,
sound in shell; air cell not more than
3/8 of an inch in depth; yolk may be
distinctly visible but moving freely;
air cell stationary; white of egg
may be slightly tremulous, any undu-
lation in the air cell line to be not
more than 1/4 of an inch in depth.
Maximum allowance at time of inspec-
tion not to exceed 8 eggs per half
case below the grade stated.

Grade (d) Seconds—Eggs sound in
shell, may contain weak, watery eggs,
eggs with heavy yolks, and all other
eggs fit for food. Maximum allow-
ance not to exceed 6 eggs per half
case below the grade stated, excluding
hair splits.

Class (2) Storage—Eggs which have
been "held" under artificial refriger-
ation at a temperature of 35 degrees
Fahrenheit or less.

Class (3a) Preserved—Eggs which
have been subjected to any process,
liquid or otherwise, intended to pre-
serve their quality.

Grade (a) Extras—Eggs reasonably
uniform in size, weighing at least
23 1/2 ounces to the dozen, or 44 pounds
to the 30 dozen case; clean, sound in
shell, air cell not more than 1/4 of an
inch in depth, white of egg to be firm,
yolk may be visible provided there is
no distinct trace of outline and the
yolk blends gradually into the white.
Maximum allowance at time of inspec-
tion not to exceed 8 eggs per half
case below the grade stated.

Grade (b) Firsts—Eggs weighing at
least 22 1/2 ounces to the dozen or 42
pounds to the case; reasonably clean,
sound in shell, air cell not more than
3/8 of an inch in depth; yolk may be
distinctly visible, but moving freely;
air cell stationary; white of egg may
be slightly tremulous, any undu-
lation in the air cell line to be not
more than 1/4 of an inch in depth. Maxi-
mum allowance at time of inspection
not to exceed 8 eggs per half case be-
low the grade stated.

Grade (c) Seconds—Eggs sound in
shell, may contain weak, watery eggs,
eggs with heavy yolks, and all other
eggs fit for food. Maximum allow-
ance at time of inspection not to exceed
6 eggs per half case below the grade
stated, excluding hair splits.

Class (c) Cracked and Dirty—Eggs,
shells of which have been checked or
broken, smeared, soiled or damaged
in shell, but fit for food; allowance
at time of inspection not to exceed 6
eggs per half case below the class
stated.

A Big Crop
This Year

Never in the history of this district has there appeared to be a better prospect of a bumper crop than this year. Last fall there was a good deal of moisture, and the early snowfall prevented the ground from freezing much, and the frost is now pretty well out of the soil. The abundant snow is melting fast, and all the moisture is soaking into the ground, making a splendid moist seed bed for the grain in a few weeks. The season gives every prospect of being one of the best the district has ever seen.

Time To
Paint Up!

Before the hot weather arrives, many Wetaskiwin buildings should have a coat of paint.

And, if these buildings get that coat of paint, depreciation will be halted to the probable extent of thousands of dollars.

A neglected house will depreciate twice as fast as a house that is painted at regular intervals. A coat of paint not only protects your house, but also protects your capital investment.

Paint brightens up your home, or office, creating happier living and working conditions. It is an investment in optimism and the joy of life.

Paint makes the town attractive to visitors, putting money into the pockets of every Wetaskiwin citizen.

For the sake of happiness and prosperity, get out the paint brushes early!

Stopping
The Paper

Every once in a while the editorial mail contains an epistle from an individual with a hobby or a grievance. These epistles emit words about something that has been printed in the newspaper, or about something that has not been printed. But they have an unvarying conclusion, which is a threat to "stop the paper."

Of course every editor respects the opinions of his fellow men, whether they chance to be readers of his particular paper or not; if he did not he could not expect his fellow men to respect his opinions. But the editor who undertook to vary the policy of his newspaper to suit every complaint or humor, every hobby of several thousand readers, would soon find himself in the poorhouse or the padded cell division of the lunatic asylum. For this reason an editor with a mind of his own and a certain amount of work to perform every day is obliged to keep a special corner of his waste basket ready for the communications of heated individuals who feel the impulse to "stop the paper."

People have been "stopping the paper" for a great many years, but for some inexplicable reason newspapers continue to be published. The answer probably is that where one individual with narrow conceptions and hide-bound prejudices takes offense at some truthful article, several hundred are inclined to applaud it. Another reason why editors are more or less contemptuous of the "stop the paper" buildozer is that the great bulk of our citizens respect a newspaper which is frank and courageous, even when they disagree with its policies, while they have only disgust for one which trims its sails to catch every passing breeze.

This is a free country, and nothing is freer than the privilege of taking a newspaper or leaving it alone. Editors would be the last of all persons to wish it otherwise. But the dear reader who imagines that "stopping the paper" also stops the presses is the victim of a childish illusion. He hurts himself far more than he hurts the offending editor or newspaper.—Summerland (B.C.) Review.

One's Biggest
Asset

Character is the biggest asset that any man can possess. A great thinker once said, "There are no pockets in a shirt."

Character is made up of the warp and woof of the soul itself. We take it with us when we go into eternity—our money, our lands, our business, our social position, we leave behind.

And yet, how many give life and opportunity for that which cannot remain.

Character is the backbone of happiness, of life satisfactions, of business success, and of ultimate reward. The man with character plus a reasonable amount of initiative will never have any trouble getting financial backing adequate for his needs and abilities.

Character, be it remembered, is what we really are; while reputation is what people think we are. Only the individual who is genuine through and through possesses character.

Only a man whose word is as good as his bond, whose integrity is unpurchasable, and whose honor is beyond reproach, can qualify for a passing mark in the 100 per cent character class.

Character includes what we are at home and at business; what we are to our inferiors and to our superiors; what we do in the face of temptation and adversity and success.

Success often tries a man's character more than adversity. Character tells people how much they can trust us and how far.

Therefore, consider that time and effort spent in the building up of character, in the cutting out of the weak, a worthy routine of life, are worth ennobling habits, in the establishment of all they cost.

Character will give the public confidence in you. It will give you confidence in yourself. It will give you courage to do, and to hope, and to smile, and to achieve.

The strong character is never a grouch, for that individual holds so much joy and victory.

Cultivate character and you will have riches beyond the price of rubies.—Ex.

Birds Observed Near
Camrose Last Year

By Frank L. Farley
Every year increasing numbers of requests are received from students and teachers in Alberta asking for information as to when our birds will arrive from the south, and the names of varieties which may be expected. These requests come from as widely separated places as Peace River and Cardston, and is evidence of the growing interest in birds.

The early settlers coming to the prairies claimed that there were few birds in this new land, and even those were poor songsters compared with the birds of the land they left. Upon closer observation and investigation this claim proved to be incorrect. We have a surprisingly large number of richly colored songsters with us during the summer, while many others pass on to higher latitudes for the nesting season.

For beauty and richness of plumage we have the Rose-breasted Grosbeak, Western Tanager, Baltimore Oriole, Mountain Bluebird, Northern Yellowthroat, Redstart, and many others equally as striking. As songsters, the Fox Sparrow, Song Sparrow, Vesper Sparrow and Lincoln's Sparrow, the Thrushes (including our common robin), the Western Meadow Lark, which far exceeds its eastern relative, the Ruby Crowned Kinglet, the Oriole, and many other varieties of the vireo and warbler family, compare favorably with the feathered warblers of Ontario and the Eastern States. In fact, with one or two exceptions, the park country of Central Alberta is just as rich in song birds as any other portion of America. It is estimated that over three hundred birds will be found regular visitors,

or migrants through this province, with a fairly large additional number appearing as stragglers through various causes through the central part of Alberta, from Pigeon Lake to the eastern boundary of the province following the general course of the Battle River, over two hundred and thirty species have already been absolutely identified. With the increased interest being manifested in ornithology at the present time, resulting in a larger number of observers, this list will be materially enlarged from year to year.

Birds observed in the locality during the winter and spring of 1924, includes 9 residents, 23 migrants which nest north of this latitude, and 74 summer residents. — Camrose Canadian.

DIVORCE FIGURES

In Switzerland where divorce is as easily procured as in the United States, there is only one divorce to every sixteen marriages as against 1 to every 7.5, whilst in Japan the rate is one out of every eight marriages. In France there is one divorce to every twenty-one marriages; in Denmark one to twenty-two; in Germany one to twenty-four; in Britain, one to thirty-two; and in Canada one to one hundred and sixty-one. These are the figures for 1923, being the latest available. Oregon put Nevada in the worst state in the Union for divorces, having in the year 1922 a divorce to every 2.5 marriages. The figures reflect a growing disposition to regard marriage as a purely civil and social contract to be dissolved by mutual consent upon almost any provocation.

A "COUGH-COLD"
IS DANGEROUS
It May Turn To
Consumption

Too much stress cannot be placed on the fact that, on the first sign of a cough or cold it must be gotten rid of immediately, as failure to do so may cause years of suffering from some serious lung trouble.

ON THE FIRST SIGN OF A COUGH OR COLD
DR. WOOD'S

NORWAY PINE SYRUP
SHOULD BE TAKEN

Mrs. B. Kelly, 803 Howe St., Vancouver, B.C., writes:—"I wish to state that I took a severe cold. It settled on my lungs and my cough was so bad, at times, it seemed as if it were tearing my lungs to pieces. I sent and got a bottle of Dr. Wood's Norway Pine Syrup and I got relief after having taken the first dose, and before I had finished the rest of the bottle I was completely relieved of my cold and cough."

This preparation has been on the market for the past 35 years. You don't experiment when you buy it. Put up only by The T. Milburn Co., Limited, Toronto, Ont.

WILL STOCK
SYLVAN LAKE

Red Deer, April 6.—Commissioner A. Stevenson's tireless efforts to get Sylvan Lake stocked with fish are at last bearing fruit. Mr. Rodd, chief fishery inspector of the province, visited Red Deer and Sylvan Lake recently and has definitely decided to install a floating fish hatchery to which pickled eggs will be brought and hatched there, the young fry being turned out into the lake. This may be continued next year, so that in three or four years a good supply of pickerel may be assured.

The Sylvan Lake board of trade has interested itself in this, and last year installed a dam at the lake outlet to prevent the fish going down the creek to Burnt Lake, where they die. The board has decided to supervise the hatchery and give Mr. Rodd every assistance.

The commissioner has also arranged with Mr. Rodd to stock some of the streams west of Red Deer with real trout this summer. The kind selected are called Lock Leven trout.

BEER FORBIDDEN
AT PICNICS BY A
NEW AMENDMENT

Edmonton, April 3.—By an unrecorded vote in committee of the whole, the Alberta legislature added another prohibition restriction to the Liquor Control act Thursday afternoon when it passed a resolution by Mrs. Nellie McClung forbidding beer at picnics. The vote of the house was one of the most striking examples of how only a snap decision.

FACTS ABOUT TEA SERIES—No. 2
Tea Production Today

If the Chinese, who first discovered tea, had realized the possibilities of the trade and had studied the nature and requirements of the plant, China might still be the largest tea producing country. Centuries of neglect, however, stunted the growth and caused the quality to deteriorate. In the mountains of Ceylon and India, tea was found to flourish. Scientific methods of cultivation and manufacture were introduced with remarkable results. Now the finest tea grown in the world and by far the largest quantity comes from these countries. "SALADA" is mainly blended from flavoury India and Ceylon teas.

"SALADA"

Fraction of the members are conducting its business during the present session. There were seventeen absences, when the prohibition number called for the vote over vigorous protests by L. A. Giroux, Liberal, of Grouard, who objected in vain to the most striking examples of how only a snap decision.

Easter!
Swift's Premium—The National Breakfast

In thousands of homes in Canada, Swift's Premium, as the world's highest standard of quality, is served all year round. But for Easter Morning this supreme quality Bacon has an added appeal—Swift's Premium has become almost the national dish on this bright feast day—when nothing but the best is adequate.

If you have not experienced the delicious flavor and uniform goodness of Swift's Premium—this coming Easter Morning would be a fitting occasion on which to try it.

Swift's Premium Hams and Bacon

Be careful to get Swift's "Premium" when you buy Bacon or Ham—make sure of it this coming Easter Morning. Order from your Butcher or Grocer.

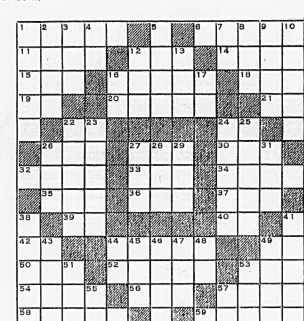

Look for this blue identification tag when you buy a whole ham or when you buy a slice.

Swift Canadian Co. Limited

Cross-Word Puzzle No. 6

SUGGESTIONS FOR SOLVING CROSS-WORD PUZZLES

Start out by filling in the words of which you feel reasonably sure. These will give you a clue to other words crossing them, and they in turn to still others. A letter belongs in each white space, words start at the numbered squares and running either horizontally or vertically, or both.

KEY TO CROSS-WORD PUZZLE

- | | |
|--------------------------------|---|
| Horizontal | Vertical |
| 1 To clip. | 1 A kind of rock. |
| 6 Habitation. | 2 To employ. |
| 11 Handle of a sword. | 3 A Canadian tree. |
| 12 I pray (Latin). | 4 Near by. |
| 14 Applaud. | 5 A concealed fellow. |
| 15 Weapon. | 6 Before Christ (ab.) |
| 16 Dignity. | 7 Aged. |
| 18 A suit. | 9 To sneer. |
| 19 Definite article (French). | 10 A period of time. |
| 20 To produce. | 12 Mineral substance from which metal is extracted. |
| 21 Canadian province (ab.) | 13 Short poem. |
| 22 Since, in a like manner. | 16 Two odd letters. |
| 24 A country (ab.) | 17 And (French). |
| 26 Endeavor, design. | 22 Passage, walk in a church. |
| 27 A floor covering. | 23 Produced by heat. |
| 28 To dress; fit up. | 24 Minute particle. |
| 32 In addition. | 25 Kind of tree. |
| 33 Part of the verb "to be". | 26 Malt liquor. |
| 34 A native of Eastern Canada. | 27 To outline. |
| 35 Member of the deer family. | 28 The same as 33 horizontal. |
| 36 A vegetable. | 29 A beverage. |
| 37 Cold. | 31 Cheerful. |
| 39 Electrical engineer (ab.) | 32 Best part, the height of. |
| 40 A New England state (ab.) | 41 grave; serious mood. |
| 42 Concerning. | 43 Arabian chief. |
| 43 To think, suppose. | 44 A light (ab.) |
| 45 To execute. | 45 To drink. |
| 46 Elf, mischievous child. | 46 A kind of plant. |
| 48 Mohammedan bible. | 47 To find fault constantly. |
| 50 A vehicle. | 48 A point of the compass (backwards). |
| 51 Manner. | 49 Engagement. |
| 52 A domestic animal. | 51 Fur. |
| 53 To lessen. | 53 Domestic animal. |
| 55 Blunder. | 55 A refusal. |
| 59 To change. | 57 A legal degree (ab.) |

The Times Office is Equipped to do Your Job Printing

To the Women of Wetaskiwin

Knowledge and Skill may be the means of preventing much suffering and perhaps saving life.

Do you know—

How to make a bed cradle? How to apply a temporary splint
How to make a bed rest? How to prepare a hot foot-bath?
How to prevent bed sores? How to feed a helpless patient?
How to make an ice-box? How to prepare patient's diet?
How to take a patient's temperature? How to change sheets with the least disturbance to patient?

THIS INFORMATION IS GIVEN IN

THE REGALL DRUG STORE - WETASKIWIN

POOLS TO RESUME CAMPAIGN IN JUNE

The campaign which has been carried on during the winter in the interest of the provincial livestock, dairy products and poultry, and egg pools has met with good progress according to a statement from officials of the pools in Edmonton. The different series of meetings which have been held throughout the province have been well attended in most instances and there has been a satisfactory response on the part of farmers to link themselves up with these co-operative selling organizations.

Owing, however, to the condition of the roads in the country, and the fact that seedling will soon be under way in most districts, it has been decided to discontinue the campaign until the month of June.

PROGRESS OF THE RED MAN

"The phrase, 'Lo, the poor Indian!' is no longer a statement of fact, judging by recent progress of the Indians in farming. Continued prosperity and advancement is reported by the Canadian department of Indian affairs. The hope is even held that eventually the Indian will become self-supporting. This promise refers to the plains Indians, for those in wooded country, where the uncertainties of hunting will lead them to lean for some time on government assistance. The paying of treaty money has long been an annual event of importance, but if the Indian taste in luxuries grows like that of the white race, the treaty grants will doubtless fail to meet the needs of the higher ruling prices. The love of shining trinkets has not been lost since the days when Cartier and Champlain first wrangled the Indians' rich furs for a few glass beads.

The Indians this year sowed 70,000 acres of land, and a crop of 1,250,000 bushels is estimated. There was an increase of 6,000 head in cattle held by the Indians in the west, a fitting sequel to the winning of first and third prizes by Indians last year for cattle received at the Winnipeg Stock Yards. On the blood reserve the Indians have been moved to the south area to secure the benefit of better soil. During the past two years these Indians have spent over \$100,000 in additional equipment.

The Times classified columns are at the command of everyone and provide the most inexpensive, sure and reliable method of locating lost articles or animals, finding situations for those out of work, filling vacant positions, renting or selling houses and scores of other purposes.

Churns; Fruit Sealers; Bed Couches; Rugs; Sinks; Clocks; Lamps; Dishers; Cream Can, No. 15 Cream Separator; Egg Cases; 100lb Flour Bin and a number of other things.

LISTENING IN AT THE BACON HOG COURSE

Mr. Stone, a returned soldier settler at Wetaskiwin, stated that hogs were putting him on his feet. He has at present 12 brood sows, and is feeding a lot of pigs on which he expects to make his money returns. He has bought feet oats and barley at present market values find, with hogs at their today values, has no hesitation in buying feed to finish his pigs with in bacon weights. Talking of the select bacon grade, Mr. Stone said there was good money in raising hogs at thick smooth prices, but every select bacon hog marketed added to the profits. After returning from the LaCombe bacon hog course, Mr. Stone will look over his breeding stock and those that are not of the bacon type will be replaced.

Many farmers report excellent results with spring litters. One farmer reports 112 living pigs from 12 bacon type sows. According to the advice of Mr. Chapman, the early spring pig has greater opportunities for utilizing the pasture of foreign crops, all which tends to reduce cost of production, and, by inducing strength and development of muscle, have a tendency to increase the percentage of select bacon hogs.

A bacon hog must be born, but it must also be properly fed, stated Mr. MacMillan of the Dominion livestock branch, Ottawa. The bacon hog is a distinctive type which has been bred and developed for many years. Length of body, smoothness of conformation, and constitution denoting feeling qualities, were all essential if a hog was to grade in the select bacon grade. The bacon type brood sow must have all the characteristics which make for the production of a hog which when marketed, is distinctive in bacon conformation, said Professor Sackville. The sow which is asked to rear large litters of uniform pigs must have plenty of depth and bone must be a good mother in order that her litters shall have the necessary thrift and vigor along with uniformity.

Hog pens need not be expensive, so long as they are comfortable, airy and dry, was the advice handed out by Mr. Reed, superintendent of the experimental station. Exercise and a variety of feeds containing the proper proportion of protein were, in his opinion, cardinal features of management in connection with the production of bacon hogs.

Farmers should take steps to get definite reports on the grading of their hogs, said Mr. Curtis, stock yards representative at Edmonton. Many hogs graded select bacon at the plants and yards, upon which the farmer got no premium. Farmers using ear tags could get a grading report no matter how their hogs were sold. Districts where buyers were not making selections on a graded basis and where select hogs were being produced, should either induce the buyer to buy on grade, mark their hogs or organize to ship cooperatively.—Market Examiner.

80,000 SQUARE MILES TO BE PHOTOGRAPHED

Ottawa, April 2.—Surveys covering approximately 80,000 square miles will be undertaken by the Royal Canadian Air Force this year in conjunction with the topographical surveys of the department of the interior. As well as photograph work for survey purposes, the force will do considerable work in the photographing of Canadian historic sites.

The forest patrol areas for the detection of forest fires has been extended this year. This season's work, which is the most extensive ever undertaken by the air force will be carried in all the provinces except Prince Edward Island.

A new feature will be a survey going down the Nelson river to Port Nelson, along the Hudson Bay coast and up the Churchill. There will be also work in The Pas mineral area. The Prince Albert and Saskatchewan regions will be surveyed in Saskatchewan.

In Alberta, Jasper Park and the Brazeau forest reserves will be photographed, the Victoria, Fort Assiniboine and Red Deer sectional surveys will be included. An area near Stewart, B.C., will be taken.

ONE THOUSAND NEW SETTLERS FOR THE WEST

Winnipeg, April 6.—Approximately 1,000 new settlers will arrive in Winnipeg during the coming week for distribution throughout the west. Twenty-eight families under the Empire Settlement scheme will be included in the total. Nearly 400 settlers are expected to arrive Tuesday morning. Seventy-two are to continue to British Columbia and 71 Hebrideans will be from the liner, Montclair, who left Montreal Saturday.

RUSH TO JOIN POOL WHEN PRICE DROPS

Membership in the Alberta wheat pool now numbers more than 31,000. Contracts were coming in rapidly this week, mostly from the district surrounding Edmonton, and the northern part of the province. The membership lists which, under the constitution, will be sent out to members in May, are now in the hands of the printers.

Since the decline of the price of wheat there has been a very marked increase in the number of contracts received at the head office of the wheat pool. This seems to indicate that many farmers who had more faith in their own marketing ability than they had in the pool, have had that faith shaken, and are now beginning to realize the advantages of cooperative marketing.

Pool officials state that the new contracts can be accepted without any fear as the small amount of wheat still in the hands of individual farmers, if placed in the pool, will not materially affect this year's final payment.

NEW DISCOVERY HARNESSES RAYS OF RADIUM GAS

London, April 6.—The experts of Middlesex hospital in London, the centre of British radium research, have announced an important discovery enabling the curative value of any given quantity of radium to be multiplied thousands of times.

Briefly the discovery consists in holding radium gas, known as radon, in its glass tubes. Radium emits these kinds of rays, known as alpha, beta and gamma, but hitherto only the gamma rays have been harnessed. The present success concerns the beta rays, which the experts now are capturing, purifying, condensing and confining in glass tubes a little thicker than a human hair to which is given the name "rods."

These seeds they are prepared to distribute to other hospitals for curative purposes and suggest they may prove useful in treating cancer, although they depreciate the idea that they are likely to prove revolutionary or offer a sure cure.

The alpha rays are very weak and are regarded as negligible.

THREE KILLED IN STORM AT MIAMI

Miami, Fla., April 6.—Three persons are known to have been killed and a number injured by a whirl storm which reached the violence of a tornado near here last night.

Property damage is estimated at a million dollars. The storm centred around Hialeah, where the new race course was recently built at a cost of \$1,500,000. The White field dirt, largest in the state, was demolished. Two persons were killed there.

After Every Meal

Pass it around after every meal. Give the family the benefit of its aid to digestion. Cleans teeth too. Keep it always in the house.

Jas. S. Watson, superintendent of the power plant, has been laid up for a few days at his home on account of a poisoned foot. Some time ago he received an injury to his heel, and this started to give him trouble a few days ago. He is getting along nicely and expects to be around again shortly.

POULTRYMEN, ATTENTION!

WE ARE PUTTING ON A COMPETITION IN WHICH YOU CAN ALL JOIN!

COMPETITION COMMENCES, MONDAY, 13th

We will give a prize each week to some Customer bringing or sending us eggs. We will change the competition from time to time, but the first week's prize will go to whoever sells us eggs with the greatest percentage of "Extras". This does not mean the most eggs, but the Best Eggs, and the Customer with Ten Dozen has just as good a chance to win as the one with a case or two.

Watch this space. The winner's name will be published each week, and at the end of June a Special Prize will be given to the winner of the most prizes.
